

PRODUCT SPECIFICATION

REF 6796 SALVEQUICK DETECTABLE FINGER BANDAGE

1 GENERAL PRODUCT DESCRIPTION

Description

The Detectable Finger bandages are packed in a cardboard refill intended for the Cederroth (Salvequick) dispenser for adhesive bandages. The finger bandages are extra- long and thus well suited to be wrapped around fingers.

The Salvequick Detectable Finger Bandages are detectable by most common metal detectors and the blue color also provides for easy visual detection, which makes these plasters especially suitable for use in restaurants and food industry.

The finger bandage can easily be pulled out with just one hand and applied on the wound.

The finger bandage consists of a backing, evenly spread with an adhesive coating, with an absorbent pad fixed centrally to the dressing. When the adhesive bandage is pulled out from the package, the lower cover will remain behind. Thus one half of the finger bandage can be put on the skin with one hand and after removing the rest of the cover the plaster is ready for use

Storage information

Dry storage in room temperature. For maximum protection, keep in original package until use.

2 DETAILED PRODUCT INFORMATION

Content per consumer unit

<u>Product/Material</u>	<u>Quantity (pcs)</u>	<u>Dimensions (mm)</u>	
Refill packages	6	30 x 88 x 100
